GlobalLogic's Smart Start initiative offers an exciting opportunity for students and recent graduates to kickstart their careers in the IT field. This free online course is designed to equip participants with hands-on knowledge of software development, hardware, and networking.

Starting in November and spanning up to three months, this course is an opportunity to learn from experienced GlobalLogic software engineers twice a week in the evenings, and easy to combine with study and work. To be eligible for the course, participants should have basic IT knowledge, including familiarity with a Linux-based operating system and a basic understanding of networking, as well as a good command of the English language.

During the Linux/Networking Smart Start course, participants will delve into the essential GNU/Linux operating system and modern networking, both of which play pivotal roles in the world of innovation across various industries, including IoT, healthcare, automotive, and more. The course will cover topics such as protocols, firewalls, and security.

One of the unique aspects of this initiative is that participants will receive ongoing support from mentors, including Q&A sessions, chat, and feedback, in their local language. All course lectures will be conducted in English, with recordings available afterward.

Upon successful completion of the course, participants will receive a digital certificate, a valuable addition to their CVs and LinkedIn profiles. Moreover, outstanding participants may have the chance to be interviewed for trainee positions within GlobalLogic, where they can work on real projects and gain practical experience in the IT industry.

This Smart Start initiative is a fantastic opportunity to jumpstart your IT career, gain practical skills, and potentially join the GlobalLogic team. Registration is open until October 23rd, so don't miss your chance to apply and take the first step toward a successful IT career. For more information and registration, visit the Linux/Networking Smart Start course website or contact **pre-hire.education@globallogic.com** for any inquiries.

GlobalLogic Education, our partner in ******, is launching [Linux/Networking Smart Start](#).

What is SmartStart?
Smart Start is a free, cutting-edge, online pre-hire program meticulously crafted by GlobalLogic's experts. This course is tailored for aspiring developers, even those with basic knowledge and no prior commercial experience. It's designed to equip them with the skills and expertise needed to excel in the IT field.

<div align="center">Apply for the course</div>

Why Linux and Networking?
Our program places a strong emphasis on two vital pillars of modern embedded technology: GNU/Linux operating systems and Networking. These technologies are the fundamentals of today's world, driving innovation across various sectors, including IoT, healthcare, automotive, industry, science, home appliances, and electronics. With Networking being implemented almost everywhere, proficiency in this area is a must for any aspiring developer.

Who Should Apply?
SmartStart is ideal for students who are already familiar with any Linux-based OS, possess basic networking knowledge, and have at least an intermediate level of English proficiency. The course will not only reinforce their existing skills but also provide them with invaluable practical experience. Every student who is willing to dedicate his time and effort has a chance to kick start their career.

Limited Spots, Boundless Opportunities
It's important to note that the number of available spots in the program is limited, and applicants will undergo a selection process. Successful completion of SmartStart opens the door to an exciting opportunity: the chance to join GlobalLogic as a Trainee, gaining hands-on experience and embarking on a promising career journey. On top of that, every participant will receive a certificate of completion.
